Airway, Oxygen, and Ventilation Skills

Date: _____ Test Site Location: _____

Candidate's Name: _____

Evaluator's Name & Signature: _____ ☐ Pass / ☐ Fail

The evaluator advises the candidate, "Please insert an oropharyngeal airway."	
Takes or verbalizes standard precautions	
Selects and measures an oropharyngeal airway	
Inserts oropharyngeal airway without displacing the tongue posteriorly	
The evaluator advises the candidate, "The patient begins to vomit. Please suction the patient's airway."	
Removes the oropharyngeal airway	
Turns on/prepares suction device	
Assures presence of mechanical suction	
Inserts the suction tip without occluding thumb-hole	
Applies suction to the oropharynx	
The evaluator advises the candidate, "Please insert a nasopharyngeal airway."	
Selects and measures a nasopharyngeal airway	
Lubricates the nasopharyngeal airway	
Fully inserts the nasopharyngeal airway with the bevel towards the septum	
The evaluator advises the candidate, "Please ventilate the patient with a bag-valve mask."	
Connects the BVM reservoir to the oxygen regulator	
Adjusts regulator liter flow to 15 liters/minute	
Opens the airway using the head-tilt chin-lift	
Selects appropriate sized mask	
Creates a proper mask-to-face seal	
Ventiles patient every 5-6 seconds and with adequate volume	
The evaluator states, "An EMT assistant has arrived." The candidate must instruct the EMT assistant to ventilate the patient while the candidate controls the mask and airway.	
Candidate reopens the airway	
Candidate creates a proper mask-to-face seal	
Candidate instructs assistant to resume ventilation every 5-6 seconds and adequate volume	

Critical Criteria

- Did not take or verbalize standard precautions (PPE)
- Did not demonstrate an acceptable suction technique
- Did not obtain a patent airway with the nasopharyngeal airway
- Did not obtain a patent airway with the oropharyngeal airway
- Inserted any adjust ina manner dangerous to the patient
- Did not initiate ventilations within 30 seconds of being instructed to do so
- Interrupted ventilations for more than 30 seconds
- Did not provide high concentration of oxygen
- Did not provide, or direct assistant to provide proper rate and adequate volume per breath
- Uses or orders a harmful intervention
- Exhibits unprofessional behavior
